

CASE STUDY

UNIVERSITY SCHOOL SHAKER HEIGHTS

The University School is a private K through 12 school located east of Cleveland in Shaker Heights, Ohio. The new 9500 furniture series from Buckstaff was selected in this renovation and addition project on the primary school's library. The circulation desk is modular to allow it to be reconfigured meet the staff's and students' needs (The staff has already taken advantage of this feature). To best meet the needs of the pre-schoolers through second graders (this library's primary audience), the installation included all standard items in the collection. Tables supporting PC's were equipped with grommets and hollow legs to conceal electric wires going into the building's floor mounted power boxes. The shelving throughout the library is solid oak and each shelf is fully adjustable in one inch increments.
